# eco-friendly, collection, for a better world

We take care of the little ones, we take care of the planet!

This new Miniland collection is designed for parents who are looking for functional products, but with the minimum environmental impact possible, a trend for a more sustainable ecosystem. This new generation of parents enjoys the benefits of eco-friendly products in the care of their children, in favor of a more natural upbringing, also encouraging a conscious and environmental behavior.

This year we're continuing to develop our food range, opting to develop projects with new materials, like PLA (bioplastic from natural, non-petroleum-based materials) and wood. We've also got a new frog design and another with chicks, in green and purple tones, available for the new articles in the collection.

We'll have two PLA tableware sets comprising a flat plate, a bowl, a special little baby-led weaning cup and a cutlery set: spoon and fork. We've also designed two other wooden tableware sets, with silicon suction pads, sold in different formats: bowl with spoon and plate with sections. In both cases, the trend towards baby-led weaning or BLW has been very much at the forefront when designing our products.

We will also have some handy lunch boxes, as well as a set of airtight containers, all made from PLA with the new collection patterns.
