miniland

Every night from my window I would gaze up at the stars, wishing I could have one. Beautiful stars, all different, each with their own light and energy, pure and twinkling with color. I wished for a staircase to reach the heavens so as to trap my own star.

Just like the stars in the sky, children's intelligence is not a unique, static quality – they are all unique and special. Creating play experiences to nurture and develop their innate intelligences means setting off on a voyage into an enriching future in which every child's growth **shines with their own energy and light**.

Welcome to our voyage to the stars!

Our Story

At Miniland, we have been accompanying parents, teachers, and children on their journey of growth for more than 50 years. The extensive experience in schools worldwide, our close collaboration with teachers and educators, and the trust of the educational community make our educational toys a consolidated option for schools and other educational establishments around the world.

Our mission

Empowering parents, educators and children to develop together all their potential.

Our vision

Building a better world where each child can shine with their own light.

Our Purpose

Teaching About Social & Emotional Learning (SEL)

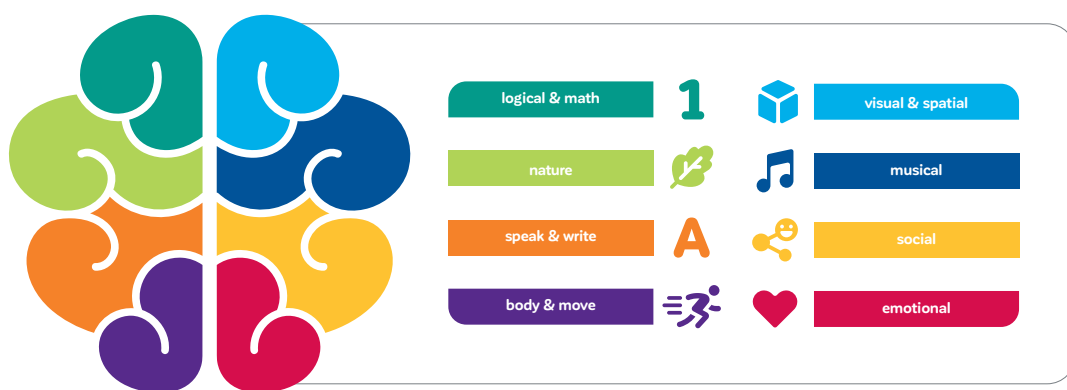

As experts in educational toys, we empower educators to discover and nurture each child's talents, through the understanding of their emotions, development of empathy and respect towards their peers regardless of who or how they are. Contributing to a world that is more open-minded, inclusive and tolerant of diversity.

miniland

Developing Multiple Intelligences

Inspired by **Gardner's Theory of Multiple Intelligences**, according to which intelligence in children is not a single, static quality, at **Miniland** we believe that empowering twenty-first-century skills with multiple play experiences will encourage the formation of communities of educators and children inspired by active collaboration, collective creativity and continuous learning.

Our Key Points

1. Our toys, tools and resources challenge young students to learn in a balanced way, evolving beyond current educational standards in harmony with the **Theory of Multiple Intelligences**.
2. They enable educators to teach from multiple approaches while detecting each child's innate abilities, talents and intelligences.
3. And attain and surpass the different phases of educational development from multiple mental frameworks and detect each child's innate skills and intelligences.
4. Children will develop a deep level of understanding from multiple angles that enables them to put into practice what they learn, both inside and outside the classroom, individually and collectively.
5. The multiple intelligences is a practical approach that promotes the multiple learning, combining play experiences based on physical and digital environments with **Miniland** “**teach&play**” (minilandteachandplay.com).

Eco-Friendly Collection

For a More Sustainable World

We are placing our grain of sand in developing **eco-friendly toys** that are more respectful of our environment. Little ones will learn the importance of taking care of the planet we live in while having fun playing!

The toys continue to be highly resilient and durable which allow them to be used for a longer period of time and therefore also contributing to a more sustainable and responsible use.

Miniland's eco-friendly toys contain **natural materials** such as vegetable-originated fibers reducing their environmental footprint and not jeopardizing the toy's quality and overall properties.

Moreover, this year our wood from sustainable woods, will be certified by FSC label.

Our SEL Collection

Miniland, our commitment to SEL & DEI

For more than 30 years, we at Miniland we have developed numerous educational toys that help promote emotional intelligence and develop social skills in. For us, SEL and DEI are in the heart of our brand.

Here we present a brief selection of the toys that can help you implement those methodologies from first educative stages.

What is SEL?

Social emotional learning (SEL) is a methodology that helps students to better understand their emotions and develop empathy for others.

This will help them to create frameworks to achieve their goals and build positive relationships with others but also to make positive and responsible decisions in the present and in the future.

SEL involves five core competencies that can be applied in both the classroom, at home, and in students' communities. These five core competencies are:

- **Self-awareness**
- **Self-management**
- **Social awareness**
- **Relationship skills**
- **Making responsible decisions**

What is DEI?

Diversity, Equity and Inclusion (DEI) is a term used to ensure all people, regardless of origin, gender, or other demographic attribute, are able to succeed in their environment.

Enhancing diversity, equity and inclusion (DEI) is a major priority for many schools. At Miniland, as educational toy experts we understand that diversity is less about what makes children different- their origin, ethnicity, gender, functional diversity or any kind of diversity- and more about understanding, accepting and valuing those differences.

Miniland Dolls Collection

A More Tolerant World Towards Diversity

With our dolls collection, we help little ones understand values of inclusivity and coexistence through play, by promoting empathy and accepting people of any origin, gender or condition.

Our anatomically correct dolls are the perfect toy to learn **SEL (Social & Emotional Learning)**, to enhance social abilities and creativity by free playing in the classroom or even at home.

Every single one of our dolls is handmade in Europe. They are made of soft vinyl and they meet all the European and American safety standards and regulations.

Discover the Collection

We present various ranges in different sized versions. Highlighted by well defined features to help identify the **most representative features from children around the world**.

Their heads, arms and legs are jointed to provide them with mobility. And all of them are **anatomically correct**. Suitable for collective use.

Light Tables & Resources

The translucent effect

Discover all our new resources for Miniland lightpads: a selection of translucent materials to make the most of this sensorial and manipulative activity that **promotes the stimulation and help the little ones to focus.**

With our translucent resources, kids will be able to have an active role, think and experiment through manipulation of elements in different shapes and colors. So they will learn in an easy self directed environment while having fun. An approach based on **Reggio Emilia educational pedagogy** and her principles of respect, responsibility and community through exploration, discovery and play.

★ SOCIAL & EMOTIONAL LEARNING

Exploring personal, social and emotional development in a fun and unique way

This collection supports and enhances a child's personal, social and emotional journey by using mainly a wealth of role-play dynamics that invite children to understand emotions, build self-confidence and ultimately increase awareness of the needs and feelings of others.

0-18
months

NEW

75013

Sand Fox

Nice and fun soft stuffed toy, a valuable educational tool that will boost motivation and responsibility in children. It incorporates a pocket on the back, which will promote multiple activities, since it will allow them to hide elements, drawings or phrases to talk about it in an assembly and to help them to express their feelings and emotions.

CPQ: 6 units 44 cm

18-4
months - years

NEW

75003

Emotions Buddy

Stuffed toy that helps children to identify emotions, the first step to being able to understand, express and verbalize them. Ideal for working on emotions from a young age and teaching children to express them, to feel heard and to develop self-esteem. The light module enriches the gaming experience by allowing a color to be associated with an emotion.

Content: 9 Velcro-backed pieces of felt with interchangeable facial features and 1 removable heart-shaped light module.

CPQ: 6 units 39 cm

1-3
years

NEW

75004

Monster Telling

Soft multi-sensory book with pictures and movable elements designed to help to promote good habits between children. It includes three story tales that cover in a fun and stimulating way three milestones in a child's development, such as potty training, learning to sleep alone or washing their hands through good hygiene habits.

CPQ: 6 units  27,3 cm

The learning experience can be enhanced with the Miniland grow&fun app, with which children can listen to the stories in English or Spanish or even record them with the teacher's voice. In the classroom, they will also be able to listen to the tale in a group and practice reading, together with the physical toy.

SESSION!**

Social & Emotional
Learning

6 high resistant discs
proposing 36 mindfulness
activities for kids ,divided
in 4 universes: 2 discs for
conscious breathing, 1 for
muscle relaxation, 2 for
yoga and 1 for meditation.

PREPARE THE GAME

Mindful Kids allows you to choose between 6 game discs depending on which need you wish to work on: conscious breathing, relaxation, yoga or meditation. The teaching guide illustrates the different exercises step by step.

CHOOSE A DISC AND SET THE TOP IN MOTION

With the help of the pupils, carry out the activity that the lower part of the spinning top points to. You can find in the included guide how to follow each activity or, even better, use Miniland Teach&Play on-line interactive resources to follow the spinning top activities (step-by-step animations)

FEEL LIKE YOU ARE PART OF NATURE

Help the participants to concentrate, through postural and breathing patterns, as well as the dialogue of sensations.

You will find countless digital and interactive resources, free of charge, at **minilandteachandplay.com**, to facilitate and liven up the staging of the spinning top activities (step-by-step animations, songs, ambient sounds and a timer for the sessions). On minilandteachandplay.com you may also find a digital library where you can access more game activities and dynamics, as well as two digital game programs (coloring mandalas and relaxing massages), all of which are available at no charge.

45407 BBQ Emotions!

This large skewer helps kids recognize and manage their emotions. Two teams, playing either individually or in a group, recognize and interpret everyday scenes compare them and talk about the emotions that this situation provokes in them. It makes it possible to work on up to ten different emotions through three game dynamics that are included in the teaching guide.

Content: 1 skewer, 1 base, 10 beads, 10 game cards, 1 poster and 1 teaching guide.

CPQ: 4 units  50 cm

**PROMOTES
THE
COLLECTIVE
LEARNING
PROCESS**

GAME MODES

CHOOSE THE EMOTION

The first team represents an everyday scene. The second team then has to insert the emotion or emotions that the scene has suggested to them on the skewer.

HOW DO YOU SEE IT?

The two teams explain the different emotions the same situation has produced in them.

TELL A STORY

The first team tells a story made up of five different situations. The opposing team has to complete the skewer with an emotion for each of the situations that have been narrated.

IT CREATES A FUN ENVIRONMENT IN WHICH TO EXPRESS EMOTIONS AND LEARN HOW TO DEAL WITH THEM

2-6
years

45401

Emoticons

Capsules that represent the basic emotions, which help to recognise and manage one's own emotions. The participants insert the game cards, which show everyday situations, or photos, drawings or other objects, into the capsules whose mood they suggest. This game can be played individually or in groups and the capsules can be nested into each other for easy storing.

Content: 5 capsules, 10 cards and 1 brochure.

CPQ: 4 units 13 cm / Ø 7 cm

Inviting children to recognize daily objects with feelings and emotions, as a start to identify similarities and differences in these emotions

miniland

3-6
years

45402

Emotions Detective

A cooperative game with which participants will discover how to control their moods. It includes cards that on one side conceal an everyday action and on the other shows a scene that provokes anger or sadness. The little detectives will have to find out what it's all about to then come up with solutions that lead to a positive feeling.

Content: 24 cards, 18 stars, 1 roulette, 4 magnifiers and 1 brochure.

Diversity Fastening Doll Collection

A different way for young children to acquire skills and personal autonomy. They contribute to the development of manual skills. Children will learn to dress and undress themselves. Fastening buttons, zippers, snaps, shoe laces, buckles and more, while playing with dolls. These dolls help them develop respect for the diversity of places of the world and genders, and learn about their community and other communities around the world.

Content: 1 Diversity Fastening Doll.

MINILAND DOLLS

Dolls of the world

Our Miniland Dolls collection focuses on helping little ones understand they belong in the world: by promoting inclusivity and acceptance, identifying emotions, and respecting the feelings of others; all through the fun and value of play. Available in an array of ethnicities and genders, our Dolls hope to represent the beauty of our differences, respecting every child, no matter their origin, sex, or condition. In addition, our Dolls help enhance social and cognitive abilities and enhance creativity through independent play in the classroom or at home.

We want to contribute to a world that is more open, inclusive and tolerant towards diversity by promoting empathy and accepting people of any race, gender or condition.

Every single one of our dolls is handmade in Spain. They are soft and they have defined features.

They are anatomically correct, which means that they look exactly the same as real babies and they help children learn about their differences and similarities.

REMEMBER THAT YOU CAN EXTEND YOUR EXPERIENCE WITH THESE FREE DIGITAL RESOURCES!

Getting to know the parts of the human body & establishing relations between people's lives and atmospheric phenomena.

You can clean and wash the Miniland dolls with no influence on its quality or durability. Please keep in mind that bathing or submerging the doll may leave some water residue inside, due to its safe design.

We present various ranges in different sized versions. Highlighted by well defined features to help identify the most representative races. Their heads, arms and legs are jointed to provide them with mobility. Suitable for collective use.

EARLY CHILDHOOD

Figuring out how the world works!

This collection helps early development of a child's social, intellectual, language, and problem-solving skills by developing hand-eye coordination as well as learning to recognize patterns and colors, how things are similar and different, and spatial concepts like "up" and "down."

0-18
months

NEW

75001

Sensorial Reef

It promotes stimulation of the senses of touch, sight, and hearing thanks to its different textures, contrasting colors, mirror and its removable octopus-shaped rattle. It is fully washable, so babies can chew on it and it can be hung up.

Content: A removable rattle in the shape of an octopus.

CPQ: 6 units  34 cm

NEW

Multi-sensory play mat with a crunchy-textured area.. It includes two small vehicles. Children will be able to play, recreate stories and let their creativity fly. The mat is very easy to pick up and folds for storage and transport to teach them tidiness and it is machine washable.

Content: 1 soft mat and 2 small vehicles.

75007

Space Mat

CPQ: 6 units  105 cm

75008

Fairy Mat

CPQ: 6 units  105 cm

Grow learning the importance of respecting the environment and it's natural resources. Each small ball has a corresponding hole in the larger sphere so little ones can match the different textures and sizes of the small spheres onto the empty spaces of the larger one. This toy is made of natural rubber and ideal for developing little ones' motor skills.

Early Childhood

97315

ECO Big Sensory Ball

This set of five natural rubber sensory balls encourages tactile and visual stimulation, and also contributes to the development of boys' and girls' motor skills. Thanks to their soft material, children find them very easy to handle. Designed in striking colors and different textures, the smaller balls fit into the big one, thus also allowing for developing eye-hand coordination.

Content: 1 large ball and 4 small balls with different textures, colors and diameters

SYMBOLIC

Imitating and pretending as they learn!

With a wide range of creative play products, kids can become anything they want to be—exploring make-believe lands and imitating real-life roles. Imaginative play helps girls and boys learn about themselves and their place in the world. It is therefore crucial to choose the correct pretend role play to help bring out the best in children especially in terms of their cognitive, social, and emotional development.

Foods

Miniland's food collection includes all kinds of fruit, vegetables and countless products found in everyday meals. Very life-like, they are made to life-size scale, highly resistant and durable materials.

Similarly, the food packs are adapted for school use as they have a didactic guide for teachers that provides full details of how to apply this material in the classroom.

They are, therefore, an excellent tool for promoting a healthy and balanced diet among children.

BUILDING SETS

Building environments that encourage and enhance problem solving from a young age

We take building sets a step forward by offering a wide range of toy solutions aimed to develop strong motor skills, hand-eye coordination, spatial and social skills and, above all, a capacity for creative and divergent thinking.

In Miniland we take care of kids, we take care of the planet. And because we care about the world we live in, we have taken a step that brings us closer to sustainability with our eco-friendly toys collection, made with materials that reduce the environmental footprint and whose durability allows a more responsible and lasting use of the toy over time.

Building Sets

94052

Towering wood stones 18 pcs

This stackable game contains 18 wooden stones from sustainable forests, in various sizes and colors. They have irregular shapes designed to be stacked to practice balance, thus developing children's motor coordination. It's an open educational toy that invites children to build, to freely create and let their imagination fly.

ACTIVE & OUTDOOR TOYS

Stimulating fresh creativity and well-being

Miniland outdoor learning toys encourage children to think of learning as an ongoing process instead of just something done in the classroom or at home.

Children's imagination is often stimulated by the objects around them and they quickly become more creative. With more room to play in, children are often more active when outside, which helps them build strong bones and good fitness levels and makes them feel happier and calmer.

miniland

Helps children to structure language in a fun and very manipulative way. Very useful as a first contact with reading and writing, with a communicative and playful approach. Send a Message is an excellent resource for preparing language lessons, as it enhances the communication and oral expression of the players, whether playing in their mother tongue or with a multilingual approach.

It has three game dynamics, of increasing difficulty:

Send Your Message

The challenge is that between them, all members of one team have to stick pegs onto a base to create a message that the opposing team has to decode as soon as possible.

Detect the intruder

Players are asked to detect the word intruder. The goal is to become familiar with the different semantic fields. Only two peg bases will be used for this game.

The crazy message

The purpose of this dynamic is to work on children's creativity in a cooperative way. The participants have to send a message that they have made up spontaneously.

MATH

Making math fun!

It is important that kids are friendly with numbers and understand how they work. Here you can find a nice selection of toys encouraging kids to learn numbers, counting and numeral recognition. Color, hand-eye coordination and fine motor skills are also developed in a secondary level.

In Miniland we are concerned about the world we live in. That's why we want to do our bit by developing environmentally friendly toys. Our eco-friendly toys contain sustainable materials, such as vegetable fibers, that do not affect the product's durability or quality. We take care of kids, we take care of the planet.

32149

ECO Math Connectable Bears

This educational toy will help little ones to take their first steps in the world of mathematics. Its bear-shaped pieces are made of bioplastic produced from sugar cane. The foam base where the pieces are placed is also made of recycled materials, and the activity sheets are made of cardboard.

This game serves as a great help in developing visual and motor coordination, space orientation and as an introduction to mathematics. It also allows for working on the base both horizontally and vertically, as well as outside of it.

Content: 64 bears, 4 game bases and 20 activity sheets

Before playing with the cards, participants should familiarise themselves with the atmospheric phenomena and the garments. They have to touch the figures, classify them and compare them in accordance with spontaneous criteria in order to work on oral expression and expand their vocabulary.

They will learn the differences between atmospheric phenomena through the cards, which show a sunny, snowy, cloudy or a rainy day, and the garments represented in the figures. In addition, they will learn how to choose the most appropriate garments depending on the weather.

SORT BY COLOUR

The challenge is to select and sort garments by the colour indicated on the game card.

CLASSIFY BY ATMOSPHERIC PHENOMENON

This consists of deciding which garments to wear depending on the weather shown on the game card.

POSITIONS RACE

Divided into teams and taking turns, the players have to place the clothes one after the other according to the colour of the card and the position and orientation of the hanger indicated by the game director.

45340

Sort & Count Vehicles

An attractive vehicles game designed to enable children to familiarize themselves with the first notions of mathematical logic through handling and the game.

Activity Cubes

A set of cubes in assorted colors designed to promote the visual learning of mathematics through manipulation, providing kids with a better understanding of mathematical logical concepts. This activity enables teachers to create different games and challenges to encourage children to discover and experiment with the first notions and concepts of mathematical logic on their own. Manufactured in highly resistant plastic, the 6 faces of the cubes fit into each other, enabling us to use them to: relate numbers to amounts, replicate colors and the manner of working with rulers, compare numbers and amounts visually, play logic and reproduction games in 3D, break up planes, identify squares, work on geometry, symmetry and the organization of spatial vision.

Content: 100 2x2 cm cubes, 20 plastic activity cards and 1 teaching guide.

**DISCOVER THE
WORLD OF
ELECTRONICS
WITH YOUR FIRST
EXPERIMENTS**

99101

Electrokit: 88 experiments

First steps in the world of electricity. Easily connected battery compartments, engines, loudspeakers, propellers, switches, lightbulb holders with light-bulbs, magnets, etc., to create the assembled models that appear in the manuals. Battery operated (not included)

Content: 1 board, 27 pieces and 1 brochure.

CPQ: 6 units 44 cm

99116

Electrokit: 198 experiments

First steps in the world of electricity. Easily connected battery compartments, engines, loudspeakers, propellers, switches, lightbulb holders with light-bulbs, magnets, etc., to create the assembled models that appear in the manuals.

Content: 1 board, 28 pieces and 1 teaching guide.

CPQ: 6 units 44 cm

RESOURCES

In this last part of the catalogue, we present a series of materials that can be used within the classroom to complement equipment in general.

Manufactured in 18/8 steel (304 steel). Miniland's little bottles preserve hot or cold drinks for longer thanks to its stainless steel wall, so that the little ones are well hydrated at school, on excursions and everywhere.

The quality of its materials allows to prolong its use and reuse in time, contributing to the sustainability of the environment. With attractive colors, a fun design and soft rubbery touch outside.

They include label with a fun sheet shape to write the name. They have a wide mouth for easy filling and cleaning. They also include anti-drip cap with washer to avoid loss and protect from unwanted spills during transport. Bisphenol A free and 100% BPA free.

85395

Naturkid bottle chip

Content: 1 bottle.

CPQ: 6 units  Ø6,5cm x 17cm

85395 chip

85396

Naturkid bottle foxy

Content: 1 bottle.

CPQ: 6 units  Ø6,5cm x 17cm

85396 foxy

	Made of steel		Soft touch
	Anywhere		Name tag
	No spills		Wide mouth

95100

A4 Lightpad

A light resource to reinforce knowledge while learning through visual stimulation. It helps kids to concentrate better since it focuses their attention on the material they are working with. Lightweight and easy to carry anywhere. For use in combination with Miniland references that are suitable for light tables.

Content: 1 lightpad and 1 microUSB cable.

CPQ: 6 units  36 x 27 x 0,5 cm

95101

A3 Lightpad

A perfect resource to enhance learning by playing with translucent accessories, including drawing and painting by tracing. It helps children concentrate because it makes them focus on the material that they are playing with. For use in combination with Miniland references that are suitable for light tables.

Content: 1 lightpad, 1 microUSB cable and Instructions.

CPQ: 6 units  47 x 35 x 0,5 cm

95102

A2 Lightpad

A perfect resource to enhance learning by playing with translucent accessories, including drawing and painting by tracing. It helps children concentrate because it makes them focus on the material that they are playing with. For use in combination with Miniland references that are suitable for light tables.

Content: 1 lightpad, 1 microUSB cable and Instructions.

CPQ: 6 units  65 x 47 x 0,5 cm

Includes teach&play digital version
